

Photography and Filming Release

Child's Name _____ Date of Birth _____

Amici Trilingual Montessori School has the need from time to time to prepare film and video tape materials for educational purposes, which include visual portrayal of a child or groups of children in our school. The Staff will, in any such case, protect the integrity of individual children, and ensure that such visual materials will be used in conformity with the highest standards of professional ethics.

Photographs and videotapes are taken of the children's activities to be used in classes, Facebook, schools website, promotional ads or to be used for the children's developmental assessment.

In addition, occasionally Amici Trilingual Montessori School participates in community events, where local media may be present. Photos of the children may be taken and published at these times.
